"Providing Cutting Edge Technology, Services and Products"

CAPABILITY STATEMENT

www.lucayantechnology.com

Lucayan Technology Solutions is a full-service Staffing, Information Technology organization that provides mission-critical support to the United States Department of Defense, along with technical support to commercial organizations. Lucayan Technology has learned from, participated in, and developed cutting edge systems and training techniques for top secret/classified initiatives. Our customers in the defense, enforcement, and surveillance space include US Army Special Operations Command, the Air Force Special Operations Command, the Naval Special Operations Command, and the Joint Communications Support Element of the military. Ultimately, we use an agile and innovative approach to discover, evaluate, architect and implement advanced solutions to ensure our customer's success.

- Software design, development, testing, and maintenance
- Software training

PAST PERFORMANCE

USSOCOM Enterprise Cybersecurity

Lucayan advises USSOCOM, its Component Commands, TSOCs, and deployed forces on threats and their potential impact on networks, systems, services and devices, we spearheaded initiatives to develop and provide documentation for the Assessment and Authorization (A&A) of the SIE, configure and operate Cybersecurity tools.

USSOCOM Special Operations Forces-Processing, Exploitation, and Dissemination (SOF-PED)

Lucayan provides Processing, Exploitation, and Dissemination (PED) of data collected by airborne Intelligence, Surveillance and Reconnaissance (ISR) platforms, specifically unmanned aerial systems-remotely piloted aircraft (UAS-RPA) in support of our USSOCOM customer.

TACOM | Personnel Security Investigation Portal (PSIP-App)

Lucayan maintained, validated and installed software modules and enhancements as required to support operations with application changes driven by National or Department of Defense (DoD) Policy, Directive, Mandates or Guidance; mission changes; security vulnerabilities; software upgrades; etc. In addition, we provided user-training instructions outlining the modifications/changes made to the PSIP application.

Joint Communications Support Element (JCSE) | Enterprise Network Engineering Services

Lucayan provides effective, efficient, secure, and reliable information network services in support of JCSE execution of its global mission and in support of its customers services. We supported deployed tactical users accessing managed DISN-TE sites, architecture, and services including data, Satellite transmission, voice, video, and any interoperability/connectivity support requirements tactical users' encounter.

DIFFERENTIATION

We run a lean operation and our leadership team has significant large company experience. As a result, this provides the following benefits to our customers: Mature business processes, Efficient delivery, constant communications, A cost structure that works well, and Highly qualified staff to provide exceptional service. We have cultivated a company culture that rewards staff for continuous improvement of technical expertise and highly regard a focus on customer intimacy. We establish customer and mission intimacy through a deep understanding of mission-set objectives, identify organization and mission pain points, and recommend and implement viable solutions to customers to assist in accomplishing mission.
